George Ragee 1888-1950

We humbly dedicate this small catalogue to the memory of George Ragee. His departure to the unseen temple leaves many friends who will always remember him for his modesty.

He was a sincere and devoted collector in many fields; but one of his outstanding activities was his coin collection, which is now being offered at auction sale. While his coin collection was not very large, what it lacked in quantity, it made up in quality.

The many friends with whom he met each Saturday at our office, join us in offering our sincerest condolences to his family and close friends.

Great News For The

U. S. LARGE CENT COLLECTOR

*The Work Of A Lifetime
Finally Realized*

**ALL SERIES OF LARGE CENTS CAN BE CLASSIFIED
WITH THESE TWO BOOKS!**

JUST PUBLISHED

**Early American Cents
(1793-1814)**

by DR. WILLIAM H. SHELDON

**"A COMPLETELY INFORMATIVE
HANDBOOK BY AN AUTHORITY ON
AMERICA'S MOST CHERISHED SER-
IES OF OLD COINS — THE EARLY
PENNIES OR LARGE 'COPPERS.' "**

Numismatists will at once recognize the importance and usefulness of this definitive work on the **U. S. Cent Pieces** of the early years of our country from **1793-1814**. It provides a scientific description of the 327 known varieties issued in the period surveyed, whereby each can be easily identified by amateur as well as professional collectors. Order and system are applied to the identification, grading and valuing of every known variety of early cents. By means of plates, and accompanying tables, even a stranger to numismatics can accurately identify and appraise the value of any example of any early coppers.

Dr. William H. Sheldon, has brought together countless early monographs and original research which will be standard reference in this field for generations. The "Sheldon" numbers here supersede the chaotic numbering and classification systems heretofore used.

This book contains 340 pages plus.

**United States
Large Cents**

1816-1857

by HOWARD R. NEWCOMB

This book contains 293 pages and 11 Master plates in addition to hundreds of hand-drawn illustrations depicting the different die-varieties. The method has been simplified and the key to identification is so arranged that even one who has never collected cents can easily work with this book.

For many years collectors found varieties of the large cent which were not listed in the booklet of Frank Andrews (Published in 1881). This prompted Mr. Newcomb to compile full new information about all unlisted varieties, and add them to those listed by Andrews. For varieties listed by Andrews, the old numbers are retained.

The original manuscript was so magnificent and concise that it was reproduced in its original form, which will enable all collectors to have an actual facsimile of the author's manuscript. As this book has been on the market only a comparatively short time and the original issue almost exhausted, we suggest you order your copy today.
